

Change Management Solutions

The objective of Change Management is to insure that standardized procedures are used when handling all changes to IT systems in order to minimize the number and impact of any related incidences.

ROUNDTABLE

For over 10 years, Roundtable has played a critical role in providing Software Configuration Management solutions to software companies and development departments worldwide.

THE EDGE

Roundtable software products are built on Progress® OpenEdge® technology promising unparalleled performance and scalability.

Roundtable® TSMS

Roundtable Total Software Management System provides integrated Software Configuration Management tools designed exclusively for Progress OpenEdge development environments.

In a single solution Roundtable TSMS integrates:

- Task management
- Version control
- Impact analysis
- Smart compilation
- Schema management
- Release control
- Deployment tools

Roundtable TSMS is available for both OpenEdge Studio and OpenEdge Architect development environments.

Roundtable® Team

Roundtable Team provides an easy-to-use, Version Control system for tracking and managing ongoing changes to:

- Development projects
- Application source code
- Related files

With the ability to manage unlimited software development projects and all project resources in a single repository, Roundtable Team provides an easy and effective solution for administering changes from the entire software development team along with powerful tools for team collaboration and parallel development.

Roundtable Team is available for OpenEdge Architect and Eclipse environment.

For more information about Roundtable products, please contact your local Progress Software sales representative.
