

# PROGRESS<sup>®</sup> SAVVION<sup>®</sup> BANKING FOUNDATION

The Progress<sup>®</sup> Savvion<sup>®</sup> Banking Foundation enables financial institutions to design and implement new business solutions in response to rapidly changing market and regulatory environments in a fraction of the time and effort they could before.

The Progress Savvion Banking Foundation automates critical processes for execution and subsequent improvements, resulting in higher levels of operational accuracy, shorter process cycle time and real-time visibility into business operations for improved business and organizational effectiveness.

Advanced dashboards and task management functionality make management of both internal and external activities very straightforward, providing end-to-end visibility into the business operations.

Using Progress Savvion Banking Foundation, institutions can develop and deploy enterprise-level financial solutions economically and swiftly while satisfying the most stringent financial and regulatory auditing requirements.

Built on the industry-leading Progress<sup>®</sup> Savvion<sup>®</sup> Business Process Management (BPM) suite, and with its best-in-class and open architecture, Progress Savvion Banking Foundation provides high availability, flexibility, and scalability with no single point of failure. It also provides a secure, access-controlled framework to allow customers and external partners to participate in your banking processes directly.

## **BENEFITS**

- > Respond to changes in business operations, policies, and regulations rapidly
- > Effectively manage operations with real-time visibility into processes and resources
- > Enforce and monitor policy and regulatory compliance with full audit trail
- > Provide secure, managed external partner access to bank processes
- > Increase efficiency by streamlining and optimizing banking processes
- > Leverage existing enterprise systems

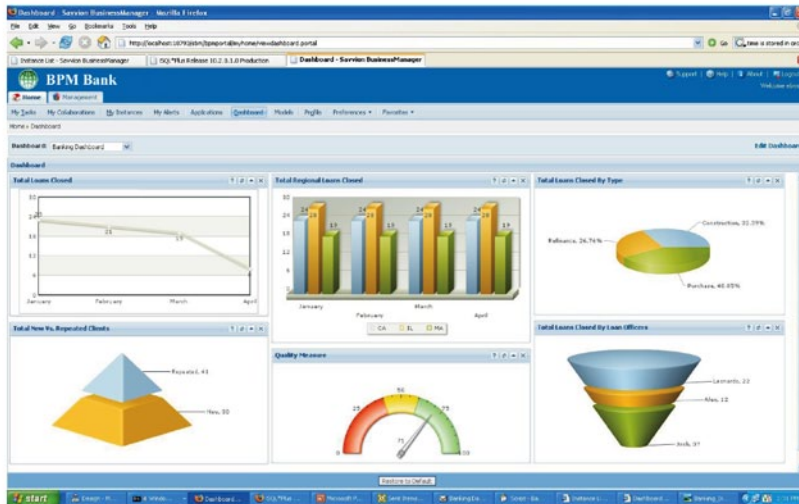

Applications developed on the Progress Savvion Banking Foundation are integrated with each other out-of-the-box. The Progress Savvion Banking Foundation also integrates with other internal and external enterprise applications, such as document management, CRM, and credit bureau systems seamlessly while simultaneously providing the flexibility necessary to customize the solution to fit your specific requirements.

## IMPLEMENTATION

With its standards-based architecture, the Progress Savvion Banking Foundation is a proven strategy for development of all banking-related business solutions in any environment. The Progress Savvion Banking Foundation encompasses a comprehensive collection of information models and special case handling scenarios, along with reference implementations and best practices tailored specifically for the banking industry. The Progress Savvion Banking Foundation integrates the existing and future banking applications seamlessly into a holistic solution with a full audit-trail capability.

## FEATURES AND FUNCTIONS

- > Intelligent work assignment
- > Activity-based Job Aid
- > Enablement of external participants
- > In-sourcing and outsourcing support
- > Reusable information models and elements
- > Configurable dashboards and reports
- > Industry standards support (MISMO, XBRL, etc.)
- > Integration with existing business systems
- > Reference implementations

## WHY PROGRESS SAVVION?

As the BPM trailblazer, Progress Savvion moves enterprises beyond ordinary BPM with proven business-critical software, solutions, and services that make organizations more competitive and cost-efficient.

Progress Savvion is an all-in-one, streamlined BPM solution for continuous business process improvement enabling business users and IT to

collaboratively deploy process improvement initiatives in as few as 30 days while delivering a return on investment as high as 300 percent. We provide business users and business analysts with easy-to-use, yet very powerful continuous improvement tools. Line-of-business managers can now responsively manage their operations, receiving continuous feedback on performance and recommended corrective actions to optimize their operations.

Progress Savvion BPM also provides the unique capability of establishing a foundation for process optimization with an integrated path to operational responsiveness through the Progress® Responsive Process Management (RPM) suite. Leveraging leading Progress business event processing (BEP) and business rules management (BRM) capabilities, enterprises can further automate their processes through smarter decision management. Together, Progress RPM™ takes visibility and control beyond BPM to deliver an intelligent business operation (IBO) solution that allows organizations to sense and respond to changing conditions as they occur. The enhanced capabilities of Progress RPM mean that businesses can now analyze ***what is about to happen*** to proactively capitalize on opportunities, driving enhanced profitability and reducing risk.

## PROGRESS SOFTWARE

Progress Software Corporation (NASDAQ: PRGS) is a global software company that enables enterprises to be operationally responsive to changing conditions and customer interactions as they occur. Our goal is to enable our customers to capitalize on new opportunities, drive greater efficiencies, and reduce risk. Progress offers a comprehensive portfolio of best-in-class infrastructure software spanning event-driven visibility and real-time response, open integration, data access and integration, and application development and management—all supporting on-premises and SaaS/cloud deployments. Progress maximizes the benefits of operational responsiveness while minimizing IT complexity and total cost of ownership.
