

Progress® eLearning Catalog

The Progress eLearning Catalog provides you with an annual online subscription for the essential training you need to build competitive applications.

HIGHLIGHTS

With the Progress eLearning Catalog, subscribers have unlimited access to all eLearning courses whenever they need it – 24 hours a day. These courses can be used both for training and as ‘quick reference’ tools when developing/transforming applications.

FEATURES AT A GLANCE

- **Online access to cost-effective training courses; no travel & expense or time away from the office**
- **Access to complete eLearning course curriculum**
- **Unlimited access for subscribers – you can utilize any online course at any time**

The Progress eLearning Catalog is a global program that Progress Software has created for partners to ensure you maximize your investment in Progress technology. Subscribing to this program will enable you to develop the competitive applications you need to grow your business.

Why has Progress developed this program?

Progress believes that our partners need to have access to the best training to keep your applications current and your business positioned for revenue growth and profitability. By providing a simple, easy-to-access subscription service, Progress delivers training to you and your staff to maximize your benefit from the technology and empower you to offer modern applications to your customers.

There is also the added benefit of the increased skills and morale for your staff as they will have access to essential training courses that can also be used as ‘quick reference’ tools to improve their expertise and productivity during application projects. According to CSTI, “training results in a 30% increase in productivity per individual”. Imagine how that can impact your business.

Components of the Progress eLearning Catalog

The Progress eLearning Catalog provides training in two forms:

- **Web-based Training (WBT)** – These highly interactive, award-winning online courses are an effective training tool.
- **eBooks** – online versions of our self-paced, text-based training (TBT+) titles, accompanied by downloadable exercises and example files.

This training program offers partners:

- An annual subscription offered on a per seat basis
- Access to our continually updated, complete list of eLearning curriculum -currently consisting of 28 courses
- Unlimited access to all courses at any time as long as you are subscribed

How does the program work?

- Work with your Account Manager to subscribe to the eLearning Catalog
- Once processed, you will receive subscription instructions and your unique training access code
- Your registered staff then has unlimited access to all online courses

Subscribers can then take any course, at any time, as many times as they need. During the subscription period, students will have access to any new or revised courses.

The Progress eLearning Catalog is not tied to one specific release of Progress product. However, specific versions of Progress must be installed on the subscriber's machine in order to complete the hands-on exercises. The required version is listed online in the System Requirements section for each course.

Additional system requirements for Progress eLearning include the following:

Requirement	Specification
Machine	100 MHZ Intel Pentium II processor or better (recommend better than 200 MHZ)
Memory	32 MB of RAM is required (64 MB or RAM is recommended)
Supported Platform	Windows 98/2000/NT/XP
Internet browser	The recommended Internet browser for this course is Microsoft Internet Explorer, version 5.0 or higher.
Plug-ins	Flash 7.0
Progress version	Progress V9 and/or Openedge® 10 must be installed on the student's machine in order to complete the hands-on exercises. Specific versions are required for each course. The required version is listed in the System Requirements for each course.
Screen resolution	The recommended display setting is at least 1024 x 768 for the display of multiple windows. 800 x 600 is the minimum size. A screen resolution of 640 X 480 will not display the course windows properly.
Color palette setting	A minimum of 65536 colors is needed, but "true color" is best. Using 256 colors will work, but some of the graphical elements may not appear as originally intended.
Installed audio card	A sound card and speakers or headphones are required to hear the audio incorporated within the course.

Localization Support

All UI screens will be in English. All training materials are provided in English.

Documentation Requirements

No documentation is required to use the Progress eLearning Catalog. Subscription instructions will be provided to the named users when they log on for the online training.
