

Secure File Transfer for Manufacturing

INDUSTRY SHEET

Key Benefits for Manufacturing Organizations

- ✓ Increase productivity
- ✓ Simplify audits and reporting
- ✓ Protect IP and operational data
- ✓ Prepare for Industry 4.0/5.0
- ✓ Reduce downtime risk

Automate Your Workflows

Supplier onboarding

Automate onboarding for new suppliers/partners and standardize how files are delivered and tracked without adding script sprawl.

Engineering and design

Securely deliver CAD, drawings, specs and test data to suppliers and design partners with centralized workflow governance.

Quality and traceability packets

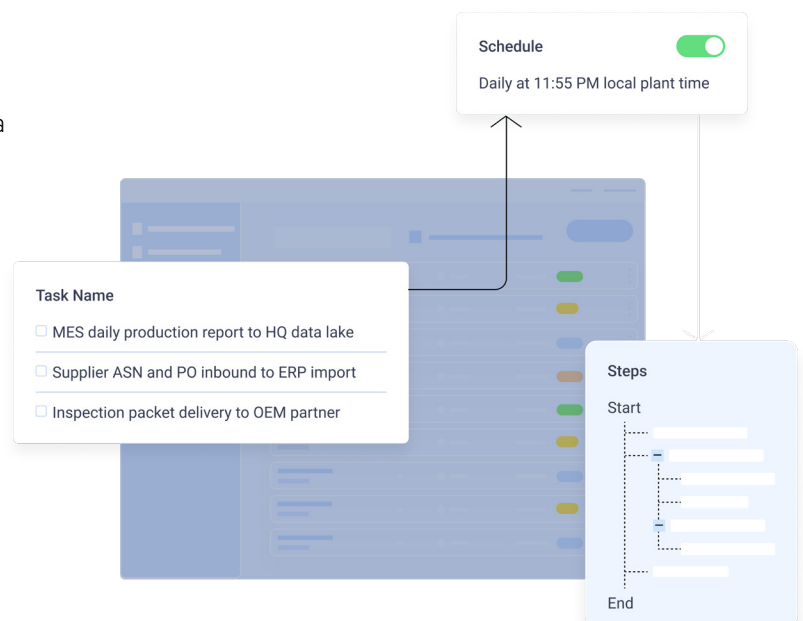

Automatically route inspection reports, regulatory documents and material certifications to the right destinations.

Plant-to-HQ reporting

Move production reports from plant export folders to HQ repositories reliably.

The Reality: File Transfer is Operations

Supplier synchronization, production reporting, QA documentation and more rely on successful data exchanges with hundreds of partners across hybrid tech stacks. Progress secure file transfer solutions are built for distributed enterprises that need centralized control but must execute locally within highly segmented OT environments. By standardizing and automating file transfers, our solutions reduce risky manual processes and give IT leaders the governance, control and connectivity they need to power manufacturing success and growth.

Choose the Right Solution for Your Environment

Whether you need cloud-first simplicity and scale or an on-prem footprint, choose the option that best matches your manufacturing workflow and deployment requirements.

Workflow Automation		Controlled Exchange Hub	
<p>Schedule, trigger and orchestrate secure file movement without scripts.</p> <ul style="list-style-type: none"> Point-and-click task builder with custom scripting available Encryption in transit and at rest Broad protocol support (SSH/SFTP, SSL/FTPS, SMTP/POP3, CIFS/SMB/UNC, ASx) Integrate with cloud applications and storage from Progress® ShareFile®, AWS, Microsoft and Google Cloud 		<p>Create a secure partner file exchange point for file drop-off and pickup.</p> <ul style="list-style-type: none"> Tamper-evident audit logs and reporting File deletion scheduling Administrative controls, access control and policy management Third-party audits with several frameworks High availability and disaster recovery Data integrity checks Intrusion detection and regular vulnerability scans

About Progress Software

[Progress Software](#) (Nasdaq: PRGS) empowers organizations to achieve transformational success in the face of disruptive change. Our software enables our customers to develop, deploy and manage responsible AI-powered applications and personalized digital experiences with agility and ease. Businesses of all sizes get a trusted provider in Progress, with the products, expertise and vision they need to turn AI disruption into a competitive advantage. Millions of developers and technologists at hundreds of thousands of organizations depend on Progress every day. Learn more at www.progress.com
