

MOVEit® Transfer

Managed File Transfer (MFT) Software for the Enterprise

DATA SHEET

KEY BENEFITS

- ✓ Centralize file transfer management and visibility
- ✓ Transfer sensitive information more securely
- ✓ Promote secure end-user collaboration
- ✓ Reduce the risk of data loss and non-compliance

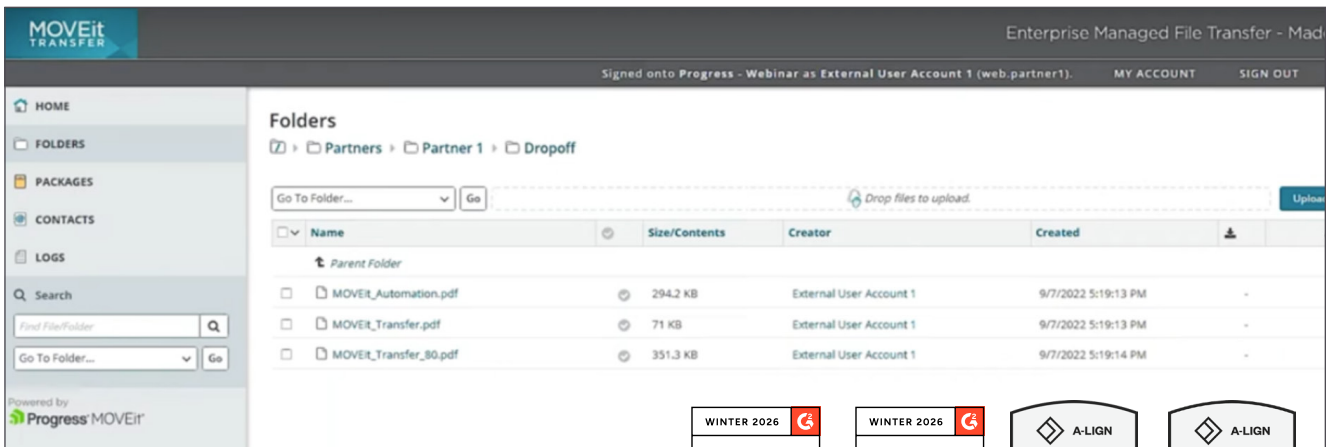

Progress® MOVEit® Transfer is a leading Managed File Transfer (MFT) software product used by thousands of organizations worldwide to provide broad visibility and control over file transfer activities. Whether deployed as a service in the cloud or on-premises, MOVEit Transfer helps your organization meet compliance standards and secure the transfer of sensitive data between partners, customers, users and systems.

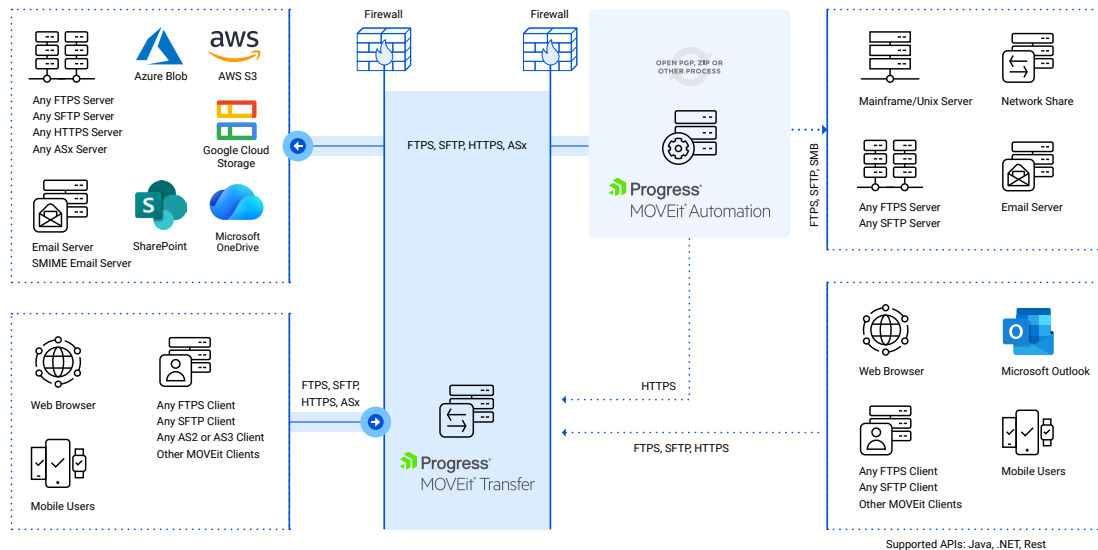

Enhanced Security and Compliance

Advanced security features include modern cryptographic foundation with OpenSSL 3.0, user authorization/authentication, delivery confirmation, non-repudiation and hardened platform configurations. MOVEit Transfer logs activities in a tamper-evident database and is backed by SOC 2 Type 2, ISO 27001 and FIPS certifications. User access can be securely controlled via Multi-Factor Authentication (MFA), single sign-on (SSO) and user-class-based password expiration policies. MOVEit Transfer also supports Secure Folder Sharing, making it simple for internal and external users to securely and easily collaborate while maintaining a broad audit trail.

Flexible Deployment Options

MOVEit Transfer gives you the management tools and visibility you need to scale transfer activities across the enterprise. It supports a range of deployment options, including as a managed service (Progress® MOVEit® Cloud), on any Microsoft Azure server or as on-premises software. The flexible architecture of MOVEit Transfer supports scalability and availability demands with a web farm implementation. Domain-based or username-based multi-tenancy configurations are also supported.

MOVEit Transfer Features

File Transfer Protocols & Connectors

- FTP
- FTPS (SSL/TLS)
- SFTP (SSH)
- HTTP/S
- SMTP/POP3
- API (REST, Java, .NET)

Security

- AES 256-bit encryption of files both in transit and at rest
- Encryption key rotation
- Modern cryptographic foundation with OpenSSL 3.0
- Cryptographic tamper-evident logging
- Encrypted administrative access
- Tiered architecture enables distributed configuration across network domains
- Automated rules for policy governance
- Multi-factor authentication (MFA)
- Support for TLS 1.3
- Whitelist endpoints
- Non-Repudiation

Administration

- Support for MySQL, Microsoft SQL Server, Azure SQL and Microsoft SQL on AWS Relational Database Service; MySQL included at no additional cost
- Delegation of permissions (Groups/Users)
- Unlimited simultaneous local/remote users
- Management of users, groups, folders, file- and user-aging policies
- Secure Folder Sharing for simple, secure collaboration
- Multiple tenants (Organizations)
- Proactive file aging notifications
- Single Sign-On Support (OIDC, SAML)

Integrations

- REST API for custom programming and integration
- Antivirus Solution Integration: McAfee, Symantec and Sophos
- DLP integration: RSA, Symantec and McAfee
- Authentication against external databases: Active Directory, LDAP, secure LDAP, Radius server or any ODBC-compliant database
- Progress® MOVEit® Gateway (data storage in a trusted network)

- Progress® MOVEit® WAF (web application firewall)
- MOVEit Add-in for Microsoft Outlook

Productivity

- Pre-defined and customizable reports
- Customized notifications
- Custom templates
- Custom branding
- File transfer for any language
- Web interface support for English, French, German, Spanish, Japanese, Polish, Arabic, Brazilian Portuguese and traditional or simplified Chinese
- Conforms with WCAG AA accessibility standards
- Ad hoc secure packages and attachments

Clients

- Automate file transfers with Progress® MOVEit® Automation
- MOVEit Client for Windows/macOS
- MOVEit Add-in for Microsoft Outlook
- Web Transfer (JavaScript)
- Mobile (Android and iOS)
- Progress® WS_FTP® Professional
- Progress® MOVEit® EZ
