Keep Pace with Changing Functionality Right at the Desktop with Award-winning Training from Progress Knowledge Services

Progress® OpenEdge® is the leading application development platform for simplifying the development and delivery of responsive business applications. It provides what Progress Software calls the "seven keys to success" for enabling our customers, partners, and end-users to deliver responsive business applications.

- Multi-tenancy
- Productivity
- Operational Excellence
- Integration and Workflow
- Security and Compliance
- Personalization
- User Interface Flexibility

As your customers and end users demand applications that can adapt to their changing needs, the knowledge, productivity, and competence of your people are critical components of delivering on their requirements. Progress Knowledge Services provides training and services to help you achieve stronger business results, avoid potential difficulties that may constrain your business growth, and maximize the benefits of application responsiveness. Through the OpenEdge eLearning Library, users become proficient in Progress products and technology, leading to increased productivity and efficiency and empowering you to offer contemporary applications to your customers.

**PROGRESS eLEARNING COMMUNITY (PEC)**

Learn exactly what’s needed anywhere and anytime through the Progress eLearning Community (PEC). This online learning and development community offers multi-dimensional learning solutions for Progress technology users. The Progress eLearning Community is designed to provide repeatable and scalable programs that allow users to become proficient in their Progress technology. Students are able to learn in their own style, at their own pace. They can go through a course from start-to-finish; go directly to the lesson or topic needed, when needed; or revisit a topic to refresh knowledge or skill. Courses are continually being added.

**THE PROGRESS eLEARNING COMMUNITY**

- Online access to cost-effective training courses; no travel expenses or time away from the office
- Access to complete eLearning course curriculum
- Unlimited access for subscribers—each student can utilize any online course at any time
REDUCE EMPLOYEE BURNOUT AND CHURN BY INCREASING MORALE AND SUCCESS

Yes, technology matters, but what happens if your people do not know how to use it properly? Frustration, anxiety, and mistakes are just some of the pitfalls a user faces if not trained properly. For the organization this translates into higher costs. No matter how good the technology, if you have inexperienced people trying to “figure it out” on a daily basis, you will see a lower return on your investment, longer time-to-value, and dwindling revenue. Providing professional development specializing in best practices on how to use Progress OpenEdge lets your team members know that you are investing in them and care about their success. As they become more proficient in their everyday tasks, they will become more productive and also more loyal because they will know they are directly contributing to the success of the organization.

YOU HAVE THE BEST TECHNOLOGY. NOW GET THE BEST TRAINING.

The Progress Knowledge Services team offers Progress OpenEdge training designed with input from our Product Engineering, Product Readiness, Professional Services, and Technical Support teams.
