

# Autonomous REST Connector

CODELESSLY CONNECT ANY APPLICATION TO ANY API IN RECORD TIME

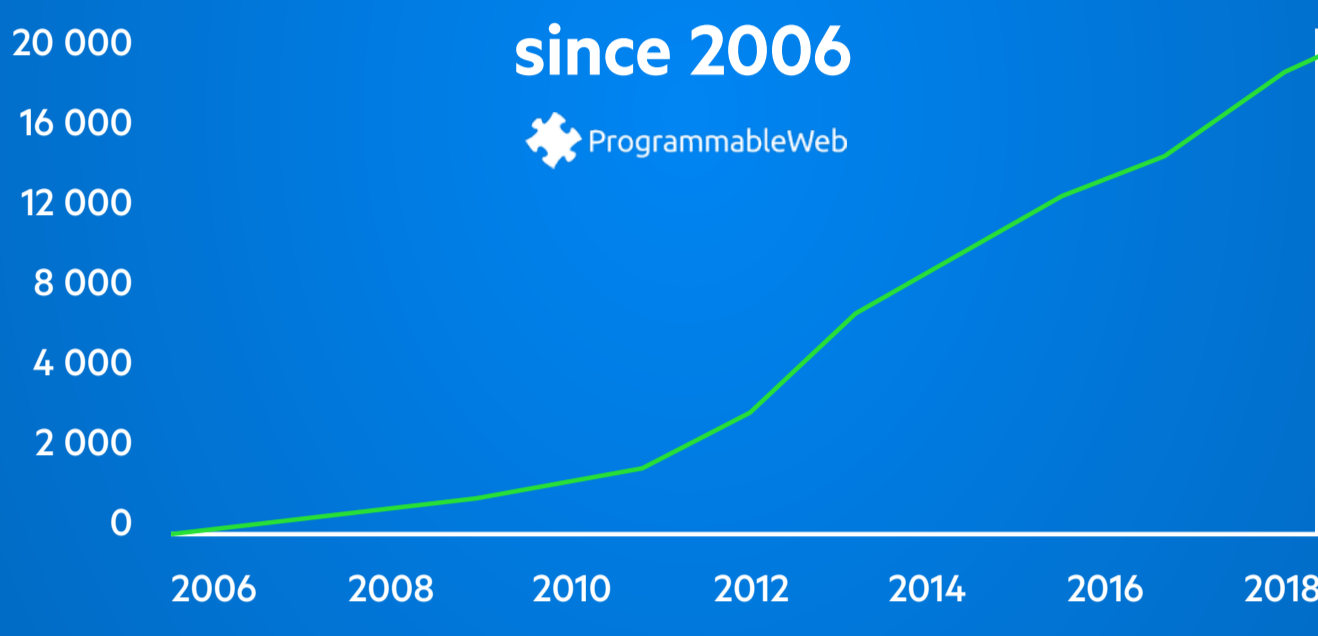

Autonomous REST Connector is an intelligent, customizable data connectivity solution from Progress that enables businesses to build and deploy enterprise-grade data connectors in minutes without coding.

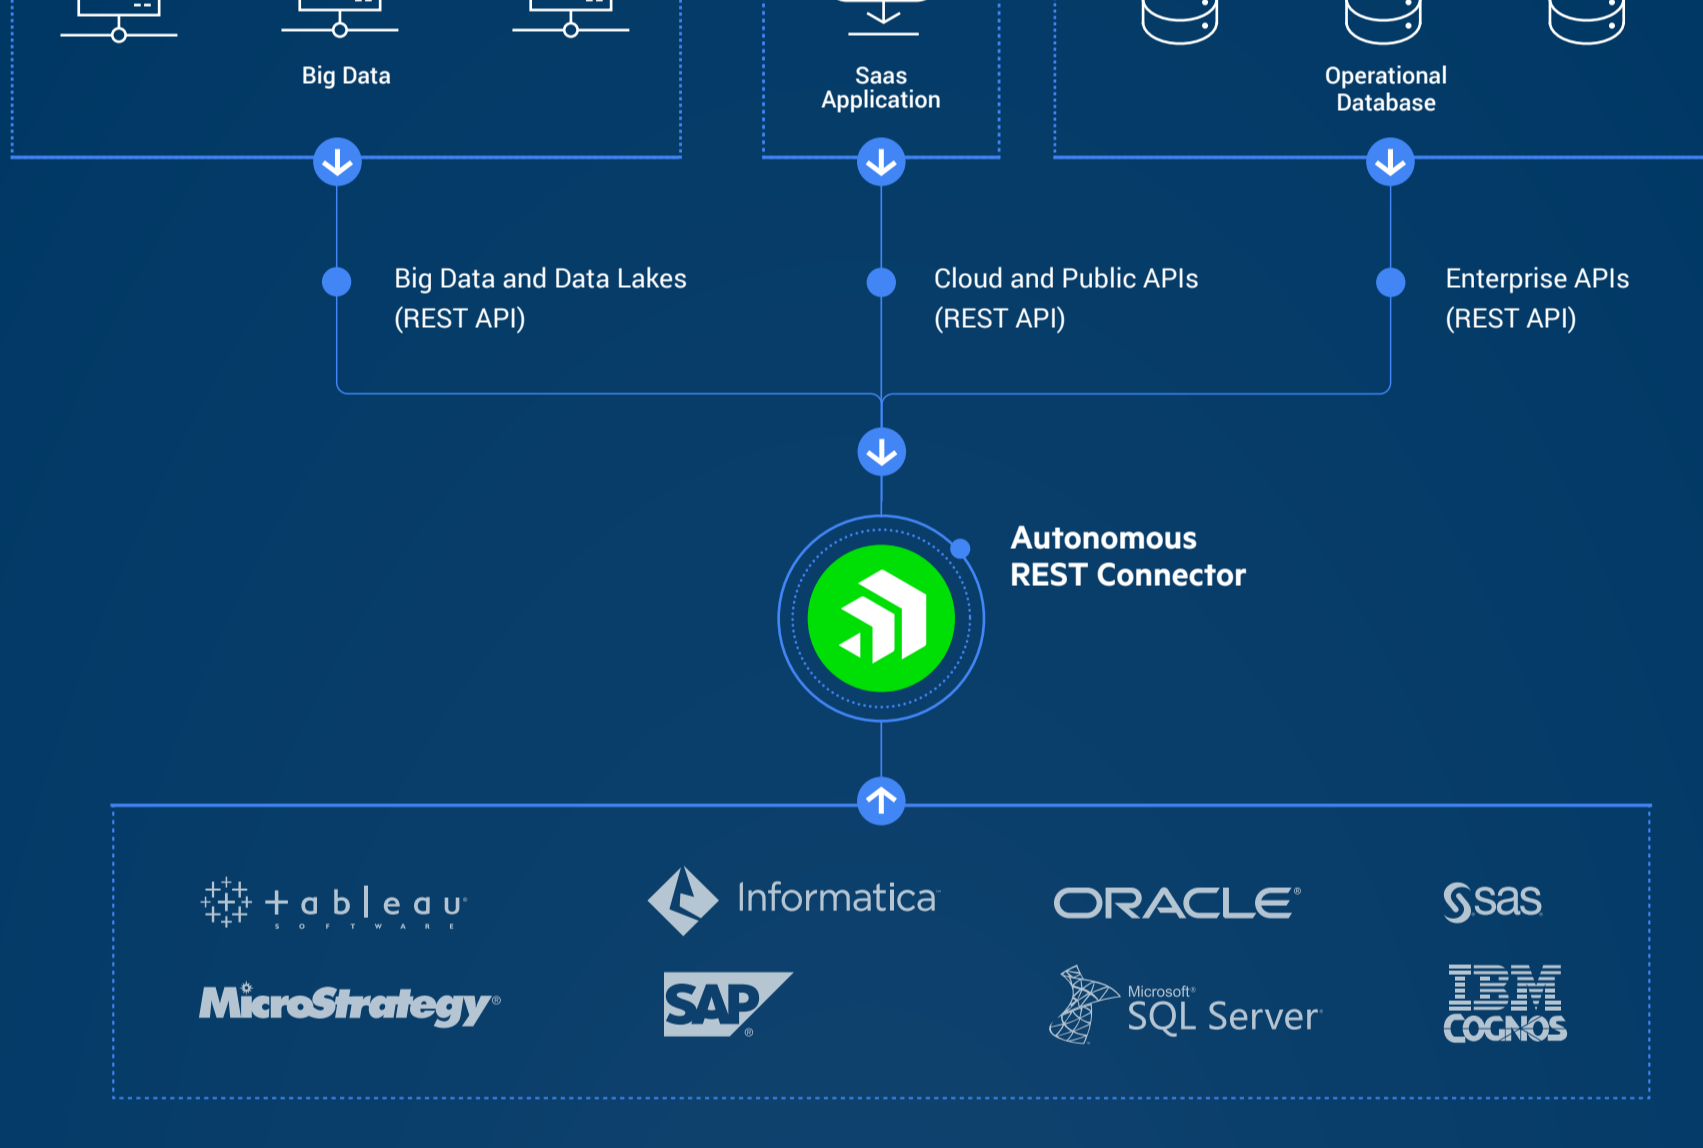

## The Rise of REST APIs

- Access Policy
- Authentication
- Data Masking

## Growth in Web APIs since 2006

## Introducing Autonomous REST Connector

## Benefits

- ✓ SQL**  
 Query REST endpoints like a standard database
- ✓ Normalization**  
 Map the JSON results to a relational schema
- ✓ Intelligent**  
 Automatically detect meta-data and relationships
- ✓ Authentication**  
 Gain control over the content that users can access

## Autonomous REST Connector solves API access via:

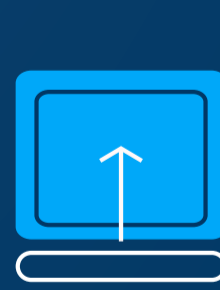

solves API access via:

Easy to Use

Rapid Deployment

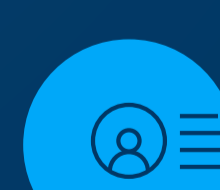

Seamless Connectivity

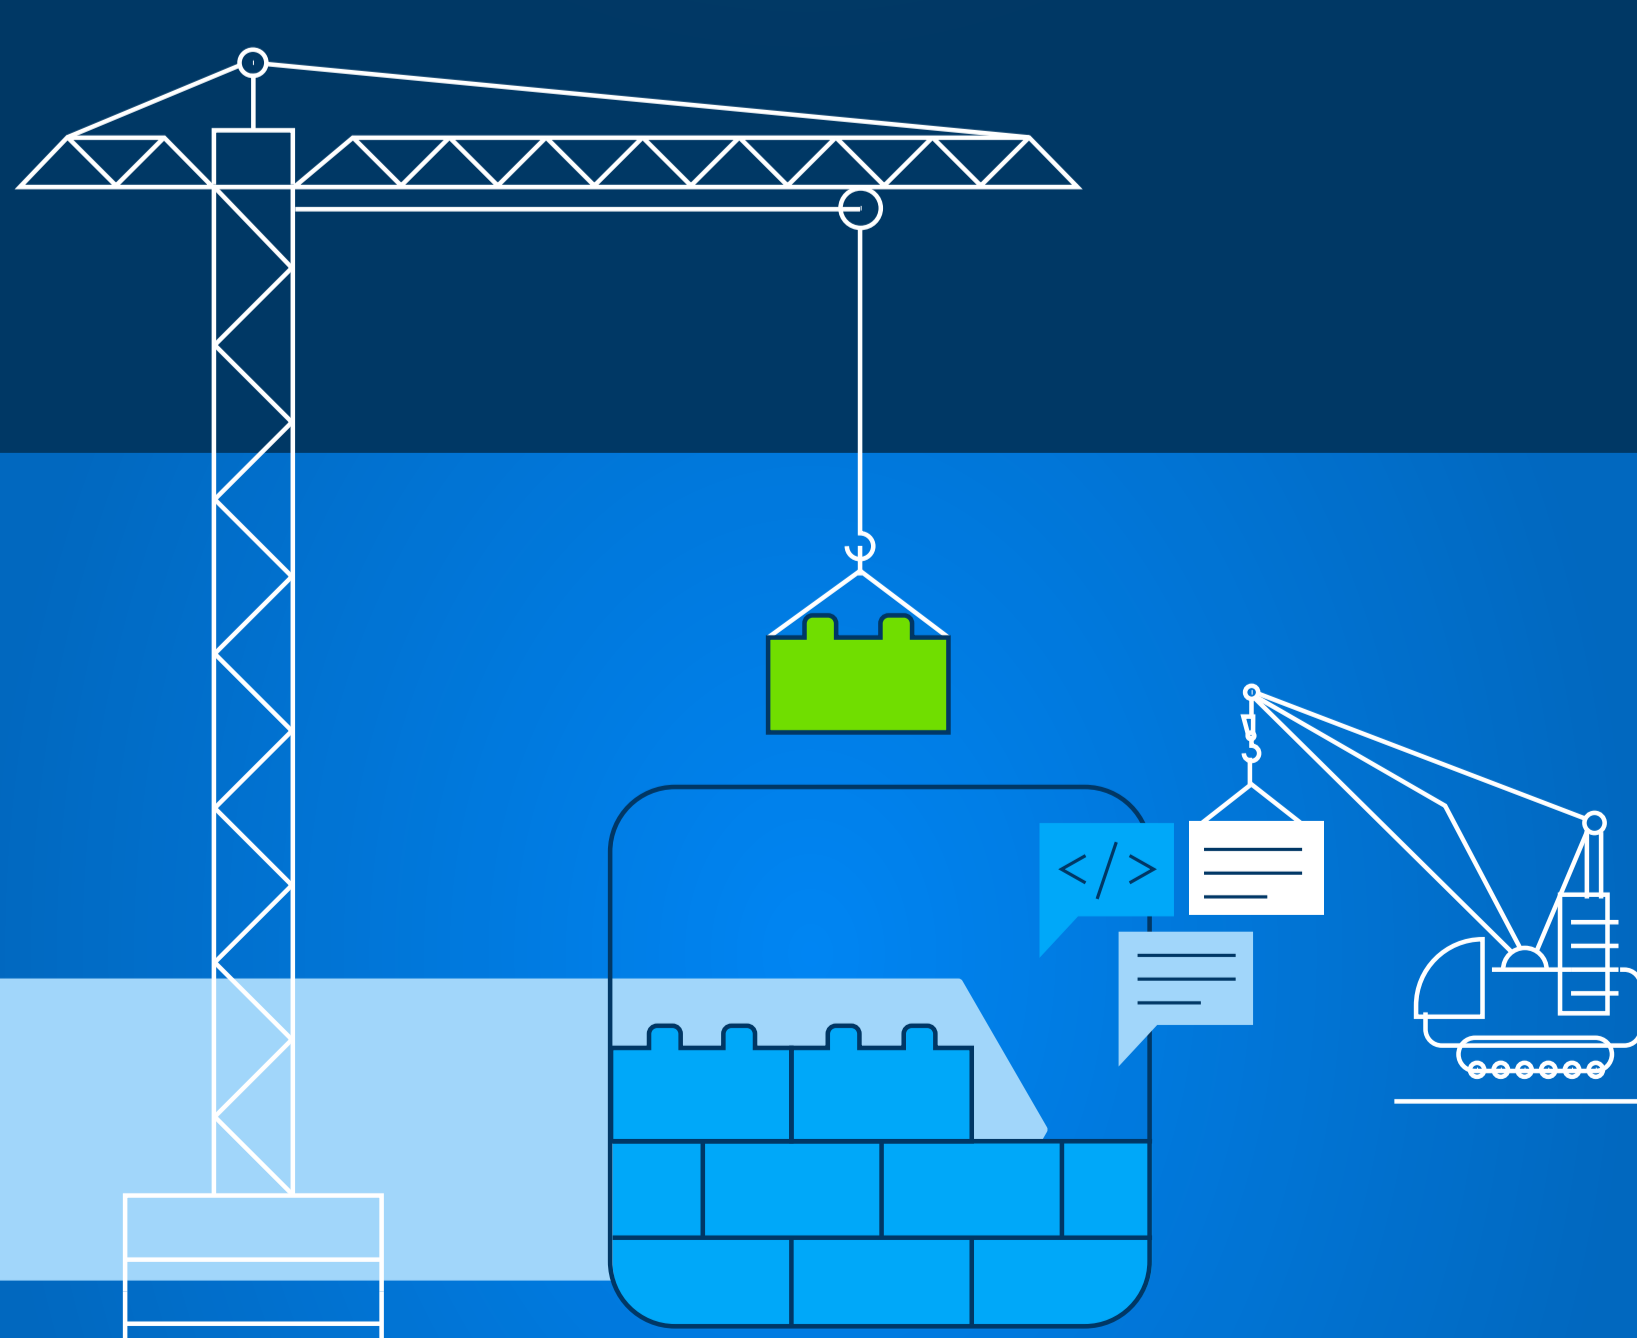

Broad Connectability

Enhanced Queries

Multiple Authentication Modes
