

Course title

Implementing Progress OpenEdge Replication for Disaster Recovery

Course duration

Equivalent to 12 hours of instructor-led training

Audience

This course is for database administrators.

Description

The course introduces Progress® OpenEdge Replication. It provides an overview of the OpenEdge Replication architecture and subsequently describes the tasks involved in implementing OpenEdge Replication in a production environment. The tasks include:

1. Planning for OpenEdge Replication
2. Configuring OpenEdge Replication
3. Monitoring OpenEdge Replication
4. Recovering from loss of a Source

This course is also available online with a subscription to the [Progress Education Community](#).

Version compatibility

This course is compatible with Progress OpenEdge 11.1.

Role-based learning path

This course is a part of the following role-based learning path:

- OpenEdge 11 Administrator
-

What you will learn

After taking this class, students should be able to:

- Describe the disaster recovery options available with OpenEdge.
 - Implement OpenEdge Replication.
-

Prerequisites

Students should already be able to:

- Perform essential database administration tasks.
-
