

Course title

Progress Application Server for OpenEdge Administration

Course duration

Equivalent to 12 hours of instructor-led training

Audience

This course is for Progress Application Server for OpenEdge administrators.

Description

This course provides an overview of Progress Application Server for OpenEdge (PAS for OpenEdge). It teaches you how to:

- Create, configure, and run a PAS for OpenEdge instance in a development environment.
- Create, configure, and run a PAS for OpenEdge instance in a production environment.

The materials that you receive with this course include a Course Guide, which includes hands-on lab exercises and step-by-step solutions, and a CD with example code and exercise files with solutions.

This course is also available online with a subscription to the [Progress Education Community](#).

Version compatibility

This course is compatible with Progress OpenEdge 11.7.

Role-based learning path

This course is a part of the following role-based learning path:

- OpenEdge 11 Administrator
-

What you will learn

After taking this course, you should be able to:

- Create and configure PAS for OpenEdge in a development environment.
 - Deploy WebSpeed applications to a PAS for OpenEdge development instance.
 - Run a PAS for OpenEdge instance in a production environment.
 - Implement load balancing for PAS for OpenEdge.
 - Monitor PAS for OpenEdge.
-

Prerequisite

Students should already have knowledge of basic OpenEdge database administration.
