

Your Big Data or Analytics Solution

On-Demand Enterprise Data Connectivity
for Cloud and Ground

and more...

ON-DEMAND ENTERPRISE DATA CONNECTIVITY FOR CLOUD AND GROUND

Client Connectivity

Expose your data via ODBC and JDBC SQL-interfaces to connect analytics tools; data management platforms; and programming languages such as Python, Java, R, SAS, etc.

Expose your data via OData (REST) API to connect popular data visualization tools; SaaS applications; and popular developer tools and libraries

Clients available for Big Data platforms, NoSQL and Cloud-hosted databases. SDK is available for custom data sources.

Backend Connectivity

Securely access enterprise data behind any firewall, without requiring SSH tunnels, reverse proxies or VPN Setups.

High performance data load from on-premises Big Data, Cloud, Relational and NoSQL Data Sources.

Bulk export data to on-premises or cloud business applications, data warehouses and data marts.
