U.S. GPO Deploys Progress® MarkLogic® to Modernize Document Publishing Capabilities

___

AT A GLANCE

GPO

The U.S. Government Publishing Office manages millions of documents and publications. With a broad mandate to modernize technologies and work processes, the office chose the Progress MarkLogic platform to replace a legacy-based file management system.

COMPANY
U.S. Government Publishing Office

INDUSTRY
Publishing
Public Sector

PRODUCT
Progress MarkLogic

COUNTRY
United States

Challenge

Replace a file-based system where work flows from one shared directory to another to support the editorial process with an XML native system end to end for producing this work.

"MarkLogic provides the enterprise-scale capabilities we need for capacity, performance, security and reliability."

Martin Smith, Manager XPub Department, GPO

Solution

Build an enterprise level, three-tiered application based on a native XML platform to author, publish and search information end to end.

Deploy the Progress MarkLogic Data Hub to help process millions of government documents.

Replaced a complex infrastructure of servers and scripts with a streamlined, efficient workflow.

Results

Load all content into MarkLogic, replacing a complicated infrastructure of servers and scripts, simplifying editorial actions.

Use the MarkLogic platform to speed up and modernize the production of the Federal Register.

Expedite the multiple editorial and approval cycles necessary for document processing.
