

Course title

Introduction to OpenEdge Database

Duration

Equivalent to 1 hour of learning

Audience

Database Administrators

Description

In the Introduction to OpenEdge Database course, you will learn about components of relational databases and relational database concepts, such as table relationships. You will also learn to use the Data Dictionary tool to create an OpenEdge database by copying an existing database. In addition, you will learn about the Sports2020 database, which is a sample database provided with OpenEdge 12.2.

This course is also available online with a subscription to the [Progress Education Community](#).

Version compatibility

This course is compatible with 12.2.

What you will learn

After taking this course, you should be able to:

- Describe relational database concepts
 - Create a database by copying an existing database
-

Prerequisites

You should already be familiar with:

- Basic knowledge of relational database management systems
 - Experience with managing services and programs in a Windows environment
-
