

Course title

Introduction to Progress OpenEdge

Duration

Equivalent to 1 hour of learning

Audience

OpenEdge ABL application developers

Description

Introduction to Progress OpenEdge is an introductory course. You will begin by learning about Progress OpenEdge and its components followed by the high-level application and process architecture. You will then be briefed about Progress Developer Studio for OpenEdge, and the types of clients that can access an OpenEdge application running in an application server. You will also learn about managing OpenEdge by means of OpenEdge Management.

The materials that you receive with this course include a Course Guide, which includes hands-on exercises and step-by-step solutions, and example code and exercise files with solutions.

This course is also available online with a subscription to the [Progress Education Community](#).

Version compatibility

This course is compatible with OpenEdge 12.2.

What you will learn

After taking this course, you should be able to:

- Describe the components of OpenEdge.
 - Describe Progress Developer Studio for OpenEdge.
 - Describe the types of clients an OpenEdge application supports.
 - Describe OpenEdge Management.
-

Prerequisites

You should already be able to:

- Understand the basic knowledge of what an application is as well as the concepts of client and server parts of an application.
 - Work with a high-level programming language.
 - Manage services and programs in a Windows environment.
-
