

**Course title**

Accessing a REST Service from an ABL Application

---

**Duration**

Equivalent to 4 hours of learning

---

**Audience**

OpenEdge ABL developer

---

**Description**

In this course, you learn how to use the *OpenEdge.Net* ABL procedure library to access a REST service from within an ABL application. This course has the following lessons:

- Introduction to REST
- Access a REST service

The materials that you receive with this course include a Course Guide, which includes hands-on exercises and step-by-step solutions, and example code and exercise files with solutions.

This course is also available online with a subscription to the [Progress Education Community](#).

---

**Version compatibility**

This course is compatible with Progress OpenEdge 12.2.

---

**What you will learn**

After taking this course, you should be able to:

- Describe how a REST service works.
  - Describe how you can access a REST service from an ABL application.
  - Make a REST request from an ABL application.
  - Process a REST response from an ABL application.
  - Use authentication in ABL REST invocations.
- 

**Prerequisites**

You should already be able to:

- Write procedural and object-oriented ABL programs.
  - Use Progress Developer Studio for OpenEdge.
-
