

Course title

Introduction to OpenEdge Application Architecture

Duration

Equivalent to 1 hour of instructor-led training

Audience

Basic OpenEdge Developer

Description

The *Introduction to OpenEdge Application Architecture* course introduces the concept of OpenEdge Application Architecture (OEAA), which is an updated, modern version of the OpenEdge Reference Architecture (OERA). The course describes the different layers in OEAA and provides an overview of how to design a complex OpenEdge application on OEAA principles.

The materials that you receive with this course include a Course Guide.

This course is also available online with a subscription to the [Progress Education Community](#).

Version compatibility

This course is compatible with Progress OpenEdge 12.2.

What you will learn

After taking this course, you should be able to:

- Describe the OpenEdge Application Architecture (OEAA).
 - Describe the OEAA layers.
-

Prerequisites

You should already be familiar with:

- OpenEdge product components
 - OpenEdge process architecture
 - OpenEdge concepts and terminology
-
