Introduction

Every OpenEdge Developers Kit (OEDK) Edition includes the specified Long Term Supported (LTS) release of OpenEdge development products. For example, OEDK Release 12.2 includes OpenEdge 12.2 products. OEDK Release 11.7 includes OpenEdge 11.7 products but does not contain any OpenEdge 12 products.

OEDK Release 12.2 includes OpenEdge 12.2 LTS products.

OEDK Release 11.7 includes OpenEdge 11.7 LTS products.

Where available and explicitly stated, the active non-LTS release may also be included in your OEDK Edition.

Subsequent Updates, if and when they become available and denoted with a change to the third digits in the version number e.g. “12.2.8”, are posted on the [Download Center](#).

The additional OEDK content varies according to the Edition to which you have subscribed and may cover all supported versions for all supported platforms.

Additional non-OpenEdge products included by Progress in a specific Edition of the OEDK are compatible with the release level of the development products. Since the OEDK is licensed under a subscription model (except for the Classroom Edition, which is subscription-free), customers must renew at the end of the subscription period to continue development. You can install the software on as many machines and for as many developers as your OEDK Subscription covers, but each developer must have a Progress ID registered with Progress Software (www.progress.com). Your organization may choose to purchase a multi-user subscription plan for each Edition, and they may choose to purchase multiple subscription plans for different Editions.

Should you require an OEDK Retired Version Add-on Edition for a different version, such as OpenEdge 11.6 or OpenEdge 10.2B then please contact your Sales Representative to check availability and pricing.

The following tables list the specific products in each OEDK Edition, and how they are licensed — whether by number of registered clients, CPUs, connections, or machines. They also detail the platforms and versions for which the products are made available with each Edition.

The contents of OEDK Edition for Release 11.7 do not include new components introduced in the 12.0 and later releases.

Available Editions and Products

The following table lists the specific products in each OEDK Edition and how they are licensed — whether by named users, connections, or machines. It also details the versions for which the products are made available with each Edition.
