

Are You Ready for Progress Application Server for OpenEdge?

DATASHEET

[Progress® Application Server \(PAS\) for OpenEdge](#) is a modern, standards-based application server designed to address scalability, security, performance and modernization challenges that are becoming increasingly difficult to manage with Classic AppServer or WebSpeed. PAS for OpenEdge introduces a more flexible and cloud-ready architecture that supports modern deployment models, improves resource utilization and enables OpenEdge applications to evolve without requiring a complete rewrite.

This short readiness check can help you assess whether it's time to move forward.

PAS for OpenEdge Readiness Checklist

You may be ready for PAS for OpenEdge if you answer yes to any of the questions below:

- ✓ Do you periodically trim Classic AppServer or WebSpeed agents to manage system resources?
- ✓ Do you restart Classic AppServer or WebSpeed to recoup memory or processing resources?
- ✓ Are you unsure how multi-process vs. multi-threaded architectures impact performance and scalability?
- ✓ Does your application rely on OS-COMMAND, INPUT, INPUT-OUTPUT, DOS or UNIX calls?
- ✓ Are security requirements becoming more critical for your application?
- ✓ Are you planning to run in, or migrate to, a cloud environment?
- ✓ Are you using mapped WebSpeed web objects?
- ✓ Have you heavily customized web-disp.p?
- ✓ Are high availability and load balancing important to you?
- ✓ Do you want to build modern REST services and work with JSON?

What This Means

If these challenges sound familiar, PAS for OpenEdge may help you modernize your architecture while improving performance, scalability and security—without the need to rewrite your application.

How Progress Can Help

If you answered yes to one or more of these questions, our Professional Services team can work closely with you to:

- Evaluate your current architecture
- Identify readiness gaps and risks
- Define a clear migration or modernization path
- Help you move forward with confidence
