Brentwood Bank Saves Five Hours Daily and Gains Peace of Mind with MOVEit Managed File Transfer

AT A GLANCE

BrentwoodBank
Welcome Home

Brentwood Bank, a 100-year-old community bank in Pittsburgh, uses Progress® MOVEit® Automation and Progress® MOVEit® Cloud to securely manage and streamline critical file transfers, reducing manual workload, improving SLAs and supporting compliance and audit readiness.

Challenge

With a lean IT team of just 10, the bank struggled with manual, error-prone file transfers and SLA risks—especially for sensitive data like payroll and personally identifiable information (PII). Additionally, a hybrid tech stack added unnecessary friction: moving recorded call data from their SaaS phone provider into on-premises storage became a constant bottleneck without a secure, automated transfer process.

> "For a bank, having a secure file transfer solution is imperative. MOVEit Automation is best of breed."
>
> **David Christopher,**
> Vice President, Director of Information Technology, Brentwood Bank

Solution

MOVEit Cloud and MOVEit Automation deployed to handle 10–40 automated jobs daily

Secure SFTP endpoint in the cloud and file transfer orchestration with data encryption in transit and at rest

Integration across their hybrid IT environment and key business applications (ServiceNow, core banking provider and more)

Results

Saved up to 5 hours of IT staff time per day

Quarterly encrypted file delivery now runs in 15 minutes instead of 3 hours

Greater peace of mind through policy enforcement, security certifications and audit capabilities

→ **Discover** how MOVEit software helps banks automate, secure and scale critical file transfers with confidence.
