

Reducing Script Risk and Reclaiming IT's Time: A Credit Union's Upgrade to Progress MOVEit

AT A GLANCE

A long-time Progress customer, this U.S.-based credit union evolved from using WS_FTP Professional client and WhatsUp Gold software to fully automated, more secure file transfers powered by MOVEit Automation software—backed by continuous investment and plans to scale.

PRODUCT

Progress® MOVEit® Automation
Progress® WS_FTP® Server
Progress® WhatsUp® Gold

INDUSTRY

Financial Services

COUNTRY

United States

Challenge

Manual file transfers and PowerShell scripts created inefficiencies and lacked consistency as data operations expanded and scaled across systems.

“Our file transfer process had grown too complex for scripts alone. We needed more automation, more visibility—and most importantly—more security. MOVEit replaced the scripts and guesswork. It’s secure, centralized and saves us hours every week.”

IT System Administrator,
Credit Union Organization

Solution

Migrated from WS_FTP Professional software to MOVEit Automation software for more secure, centralized file transfer workflows

Replaced PowerShell scripts with automated tasks built in a no/low-code builder and scheduler

Integrated MOVEit software with an expansive partner and internal IT ecosystem, including Tableau, NetSuite and internal processes

Results

File transfers are automated, reducing the risk of human errors and missed SLAs

No more babysitting old, brittle and manual scripts - creating and testing a script that previously took days now takes 30 minutes or less

Over 15 years of success with Progress tools and support

Explore how MOVEit Automation software can transform your file transfers— more securely, at scale.
