

Healthcare Network Modernizes Secure Data Exchange with Key Partner Agencies Using MOVEit Cloud

AT A GLANCE

A public healthcare network modernized secure data exchange by replacing an on-premises SFTP server with Progress[®] MOVEit[®] Cloud. The managed, compliance-ready solution reduced security risk, eliminated server maintenance and now supports daily PHI exchanges with key provider agencies.

INDUSTRY
Healthcare

PRODUCT
Progress[®] MOVEit[®] Cloud

COUNTRY
United States

Challenge

Managing an on-premises SFTP server introduced growing security risks and operational overhead. The organization needed a HIPAA-compliant, cloud-based solution to securely exchange large volumes of sensitive healthcare data without ongoing patching, monitoring or manual workarounds.

“I like MOVEit. It’s easy to use, the pricing is fair and it just makes sense.”

**Data Warehouse / Database Administrator II,
Public Healthcare Network**

Solution

Replaced on-premises SFTP with a fully managed, compliance-ready MOVEit Cloud solution.

Eliminated server patching, OS updates and infrastructure security management.

Provided audit logs, alerts and secure ad-hoc transfers without daily administration.

Results

Improved security posture by removing exposure tied to self-managed SFTP infrastructure.

Saved an estimated 6-10 engineering hours per month by eliminating server maintenance.

Reliably exchanged large PHI files daily with key external providers.

Learn how Progress MOVEit Cloud simplifies secure, compliance-ready file transfer for healthcare organizations.
