

# DeliBarn Streamlines Operations and Goes Paperless with Podio

AT A GLANCE

European food manufacturer **DeliBarn** was struggling with disconnected tools and paper-based workflows. With the Progress® Podio® Workflow Automation solution, the company centralized operations and digitized factory processes, enabling business users to build workflows without consulting IT.

## Challenge

DeliBarn struggled with fragmented systems and paper-based factory workflows. With limited IT capacity, maintaining complex platforms was difficult, and the company needed a flexible, scalable solution that could support diverse processes without slowing teams down.

## Solution

Centralized workflows to unify service desk, CMDB, project management and operations, all on one unified platform

Digitized factory processes using web forms, QR codes and automated, action-based workflows

Enabled business users to rapidly build and adapt apps without heavy IT involvement

## Results

Eliminated paper-based processes across factories, digitizing reporting and approvals on the shop floor to boost overall operational efficiency

Scaled adoption to 600+ workspaces, 3,000 apps and 1.5M+ items with minimal IT management or overhead

Accelerated development cycles from months to days, increasing agility and responsiveness across teams

### COMPANY

DeliBarn

### PRODUCT

Progress® Podio®

### INDUSTRY

Manufacturing, Food & Architecture

### COUNTRY

Belgium

**“Progress Podio is the perfect tool to remove all the paper from the factory floor.”**
