

PaperTrl Secures High-Value Financial Transfers with Progress Automate MFT

AT A GLANCE

PaperTrl strengthened secure ACH file exchanges with banks by adopting Progress® Automate MFT. The cloud-based solution helped PaperTrl improve compliance, visibility and efficiency. The platform is now supporting the secure movement of more than \$250 million in financial transactions per quarter and preparing to establish over 100 more bank connections within the next twenty-four months.

Challenge

As an accounts payable automation platform serving banks, PaperTrl needed a secure, compliance-ready and flexible solution for ACH file transfers. Legacy tools required custom scripting and lacked the visibility and controls required by financial institutions.

“Automate MFT is bulletproof. It’s not just about cost savings—it gives us the visibility banks expect.”

Steve Weber
CEO, PaperTrl

Solution

Adopted cloud-based Automate MFT for secure, compliance-ready file transfer automation trusted by banks.

The task builder eliminated custom scripting with built-in file handling and character conversion capabilities.

Automate MFT integrated quickly with existing systems, enabling production use within days.

Results

Securely moved more than \$250 million in transactions per quarter through Automate MFT.

Reduced reliance on development and DevOps teams for onboarding new bank connections.

Established a scalable foundation to support thousands of automated tasks by the end of 2026.

Discover how Automate MFT enables secure, scalable file transfer automation for financial services organizations
