PROGRESS® OpenEdge®

IMPROVE AVAILABILITY AND MANAGEABILITY WITH PROGRESS® OPENEDGE® 11.4

OVERVIEW

At Progress Software, we simplify the job of creating and operating the world's best business applications. Our Progress® OpenEdge® application development platform offers a complete, out-of-the-box solution for developing, deploying, and managing business applications offered as a service or on-premises. New features and capabilities include OpenEdge Database Table Partitioning, Mobility and Progress Developer Studio for OpenEdge enhancements, as well as tighter integration with Progress® Pacific™.

WHAT IT DOES

Progress OpenEdge is designed to assist software developers and business analysts to address changing market and business application requirements. Applications built with OpenEdge are reliable, easy-to-maintain, cost effective and service-enabled. As a result, customers are able to capitalize on new opportunities by getting competitive applications to market faster. With OpenEdge 11.4, we focused on data availability and manageability.
